

Biography - Mike Hughes

Mike Hughes is a Senior Associate.

Mr. Hughes has eight years of security criteria and systems design experience in commercial, multi-use, educational, federal, cultural and high risk facilities, following 10 years of prior corporate security management experience. Mr. Hughes has project management and leadership experience in the design and engineering of electronic and physical security systems and oversight of design and construction administration services. His direct project activities include development of operational, technical, and physical security programs and development of product specifications. He routinely works with ownership and design, contracting, and costing professionals to integrate security elements into the project infrastructure, responsive to architectural designs. This includes electrical systems support, HVAC systems support, vertical transportation integration, lighting requirements, IT systems integration, vehicle interdiction and conduit and wiring raceway coordination.

Mr. Hughes has provided consulting and design engineering for Data Centers, Critical Infrastructure Projects, Multi-Tenant Projects, Universities, and Courthouses.
