

### **Biography - Jeremy Zweeres**

Jeremy Zweeres is a Senior Associate.

Mr. Zweeres joined the firm in early 2007. His duties include the day-to-day project management and engineering of both physical and electronic security design. Mr. Zweeres works with ownership, architects, construction managers, and trade engineers to integrate security design criteria into a project's design. This includes the coordination of security requirements for electrical systems, fire alarm and suppression systems, glazing design (ballistic and forced entry), HVAC systems, lighting systems, tel/data systems, vehicle interdiction, and vertical transportation. Mr. Zweeres is also responsible for the oversight of system design implementation by security integrators and construction administration services provided by the firm.

Mr. Zweeres has worked on a number of high profile projects across the United States, including, most recently, Barclays Center (Brooklyn, NY); The Barnes Museum (Philadelphia, PA); The Broad Museum (Los Angeles, CA); Madison Square Garden (New York, NY); National Museum of American Jewish History (Philadelphia, PA); Peabody Essex Museum (Salem, MA); Philadelphia Museum of Art (Philadelphia, PA); Wadsworth Atheneum (Hartford, CT); and the new World Trade Center site (New York, NY).
